

PENTHOUSES - EXTRUDED ALUMINUM (P-series & M-series)

Design Features – Penthouses may be utilized as an attractive concealment of mechanical equipments and offer excellent air intake or relief while providing protection from outside elements. For storm-driven rain protection, a wind-drain rain louvers may be used.

STANDARD CONSTRUCTION

ALL MATERIAL – EXTRUDED ALUMINUM 6063-T5 (KB-45)

FRAME

.081" thk. extruded aluminum (see frame styles)

BLADES

.081" thk. extruded aluminum, (see blade styles)

ROOF

.063" formed aluminum (5005-H34), undercoated with black tar for anti-condensation

LOUVER AND ROOF SUPPORTS

Aluminum angles designed for (25) psf wind load. Consult Safe-Air/Dowco engineers for heavier loads.

FASTENERS

Plated steel screws

MAXIMUM SIZE

Unlimited, to be shipped in pre-assembled sections

MAXIMUM FACTORY ASSEMBLY SIZE

84"L x 84"W x 48"H

(Type of finish may limit maximum sizes)

MULLION

Invisible

MINIMUM SIZE

12"L x 12"W x 12"H

UNDERSIZED

1/4" under ordered size unless specified Exact or Actual

SCREEN

3/4" x .051" expanded aluminum bird screen

FINISH

Mill

VERT. SECT / ELEVATION

OPTIONAL CONSTRUCTION

BLADES, FRAME & ROOF - Available in heavier gauge material

SCREEN - Many styles available please consult screen listing

FINISH – Factory Prime Coat, Powder Epoxy, Powder Coat (AAMA 2604), Powder Coat (AAMA 2605), Kynar 500 2-step, Kynar 500 3-step, Clear Anodized 204-R1, Clear Anodized 215-R1, Bronze Anodized, Black Anodized

MULLION – Visible for architectural preference

CONSTRUCTION – Fully welded construction

DEM-05	5"	Drain / sight proof	2" oc.	57%	1121	.27" wg.	

Notes:

- Above performances are based on 4' x 4' unit, smaller sizes have less free areas than larger sizes.
- Wind-driven rain louvers may be used for storm-driven rain protection. Consult factory for more information.
- Any type of louver blades not shown above can be used as penthouses, i.e. adjustable louvers, combination louvers, or vertical blade configuration. Consult factory for availability.
- Back-draft dampers, control dampers, motorized/non-motorized can be installed in the throat of penthouses or roof curbs.
- Removable roof or insulated roof is available as an option.
- Roof curbs are available as option (see roof curbs section)
- Drainable louvers are best recommended with post corners and visible mullion to prevent water from cascading.

SILL FRAME STYLE

ROOF CURBS	
LOUVER DEPTH	CURB – O.D. ACTUAL
4"	Dim. Pt. + 6"
5"	Dim. Pt. + 8"
6"	Dim. Pt. + 10"

Note:
Curb thickness shall be no more than 3" thick to fit inside the bottom frame.

Visible Mullion
(recommended for drainables)

Invisible Mullion
